

# Some Homework Guidelines

- 1) Please use complete (or nearly complete) sentences. Just be very clear about what you did.

`"Using a BLASTp search from the human BLAST page and inputting the exact sequence as given in the homework prompt (searching the RefSeq database) the first hit showed 100% homology. I then clicked on the blue "G" link which took me to the Entrez Gene page for nucleolin, and all relevant data was contained therein."`

- 2) A little whitespace is nice...
