

### Online Homework Instructions

A major part of the homework for this class consists of a number of online homework assignments using Gradiance Online Accelerated Learning (GOAL). To be able to access the online homework, please do the following:

1. Go to the GOAL webpage at <http://www.aw.com/gradiance>
2. Register by following the online instructions and entering the Access Code in the Student Access Kit that comes with the textbook for the class. You will be asked to create a Login Name and a Password.

If you have not purchased the book, then you can still purchase student access to GOAL by following the link “Purchase Access to Gradiance”, next to the picture of the textbook.

3. After you have registered, you need to take another step to enroll in the class. For this:
  - (a) Login in to GOAL using the login name and password you established in the previous step.
  - (b) After you have logged in, enter the class token, which will be provided to you by the instructor via email before the first day of classes and also during the first day of classes.
  - (c) Finally, click at the link “CS 130 Models of Computation” to access the homework for the class.
