Permission and Disclaimer

Permission to use, copy and distribute version 0.30 of CODA and its documentation for
any purpose is hereby granted without fee, provided that both copyright notice and
this permission notice appears in all copies.

The MRC Biostatistics Unit and all authors disclaim all warranties with regard to CODA,
including all special, indirect or consequential damages or any damages whatsoever
resulting from loss of use, data or profits, whether in an action of contract, negligence
or other tortuous action, arising out of or in connection with the use or performance
of CODA.

Authorship note

CODA was conceived and motivated by Cowles (1994), who developed the original pro-
gram as part of her PhD thesis concerning practical issues in implementing the Gibbs
sampler. It has been modified by the first author of this manual (NGB) to provide
software suitable for general release.

Research Council (UK) is gratefully acknowledged. The work was funded in part by ESRC (UK) Award Number
HS19 25 5023. We are also grateful to Brad Carlin for many helpful comments and ideas concerning the CODA software
and manual, and to Steve Brooks for suggesting the graphical implementations of the Geweke and Gelman & Rubin
convergence diagnostics
