CMPE-12C/12L
Fall 2002
TTH: 10:00am – 11:45am
Class room: Merrill 102

Instructor: Cyrus Bazeghi
E-mail: cyrus@cse.ucsc.edu
Office Hours: MWF 2pm to 4pm
Office: BE 157C
Office: (831) 459-2217
Home: (831) 465-0582
Cell: (831) 239-3176

Lab TA: Joseph Sung (chengyus@soe.ucsc.edu)
Class TA: Dan Yuan (dyuan@soe.ucsc.edu)
Office hours: Tuesday and Thursday 1:00pm to 2:30pm
Office: BE340 (knock and ask for Dan)

Text Book

WWW site and Newsgroups
http://www.soe.ucsc.edu/classes/cmpe012c/Fall02/index.html

Check this site often, as this is where the homework assignments, lecturer notes, homework, and test solutions are posted.

The newsgroup ucsc.class.cmpe12c is available for our use. Use Netscape or bind_locker public and use rn (or xrn) to read the newsgroup. You can post articles by either following up other articles (‘f’ or ‘F’ when reading an article in rn, the second form providing a copy of the original article) or using the Pnews program.

Course Work
We will have a quiz at the beginning of every class.

There are weekly 12L lab sections. You must be enrolled in CMPE 12L to remain in this class unless you have previously taken and passed the lab section!! The lab assignments may be due on either of your two lab days (to be announced each week). Due to organizational difficulties, changing lab sections is not permitted. Labs will be submitted electronically and graded by the lab TA and tutors.

We will be working with two assembly languages in this course: MIPS and HC11 (via a different set of tools and a really neat lab kit).
We will have weekly lab assignments. No collaboration is allowed on programming assignments unless explicitly permitted in the assignment write-up. When permitted, collaboration must be acknowledged and may only be with current course staff or students currently enrolled in CE12L. Failure to give credit when collaboration is allowed is a form of academic dishonesty and can be grounds for failure of the course. You are not allowed at any point to share actual code with another student, collaboration is the discussion of the topic and how to solve it at a high level.

Academic honesty is a requirement for the course. As mentioned, all assignments must be your own independent work. Similarly, cheating on the midterm or the final will result in failure in the course and further damage to your academic career as appropriate. DO NOT CHEAT, IF CAUGHT YOU WILL BE DROPPED FROM THE CLASS AND THE LAB AND REPORTED TO YOUR COLLEGE AND THE DEPARTMENT.

The class (CMPE 12C) grade is determined by the following criteria: Quizzes (20%), Labs (20%), Midterm Exam (20%), and the Final Exam (40%).

The lab (CMPE 12L) grade is determined solely by your performance on the lab assignments.

If you have any disability-related needs, be sure to contact the Disability Resource Center well in advance of any expected need.
