1. Traditional PCI is a “bus”. PCI-Express is not. Why?

2. What is the theoretical peak total bidirectional bandwidth of each of the following protocols? You may need to look some of these up online.
   a. 33MHz, 64-bit PCI
   b. 133MHz Quad-Pumped Dual-Channel FSB
   c. PCIe x16
   d. 200MHZ DDR2 RAM
