Come see the Mechatronics class public demonstration of their final class projects, and see why they have not slept in weeks. The public is invited to cheer and heckle the competition as they run their ‘droids through the field. You might have to duck a few ping pong balls.

The Rules:

(1) Droids must be autonomous, once the time starts, no help.
(2) Droids must hit the 5 Tie fighters in sequence, and then shoot the four inch gap in the Deathstar using ping-pong or Nerf balls.
(3) Points are: 10,20,30,40,50 for each Tie fighter respectively, and 100 for the Deathstar
(4) Each droid has two minutes to score as many points as possible.

What: CMPE 118/L Mechatronics Demo
Where: E2-192 (Enter from the courtyard)
When: Thursday, 9-June-2005, 5-6PM
