Come see the Mechatronics class public demonstration of their final class projects, and see why they have not slept in weeks. The public is invited to cheer and heckle the competition as they run their ‘droids through the field. You might have to duck a few ping pong balls.

The Rules:

1. Droids must be autonomous, once the time starts, no help.
2. Droids start back to back, and must move into the firing zone before shooting at each other using ping-pong or Nerf balls.
3. A “Duel” is won either by 3 “body” shots or by knocking the can off the opponent droid’s head.
4. Each droid has two minutes to score as many body shots or to win the match.

What: CMPE 118/L Mechatronics Demo
Where: Jack Baskin Engineering - 152
When: Friday, 17-March-2006, 6:30 – 8 PM
