Summary of VM Guidelines

• Before logging out or disconnecting
  – Halt VB VMs
    • This may take some time... wait for couple of lines after “login:” prompt
  – Stop GNS3 (the red button)
  – Quit GNS3
  – Logout/disconnect

• To “Resume-Session” (after disconnection)
  – Don’t change port # field to login name
  – May need to increase port # by small amount
    • From 5910 to 5911, 5912, ...
    • Caused by other X11 sessions on host... e.g. SSH
