Homework Assignment 1
(due at the beginning of the class on Tuesday, October 5, 2004)

• Read chapters 1 through 2 of the book.
• Exercises from page 23 of book: 1.1 through 1.6.
• Exercises from page 46 of book: 2.1 through 2.2.
• What version of UNIX is on the CATS instructional computing system: at unix.ic.ucsc.edu?
• Find 3 internet links that you think will be useful to the class and email them to dbailey@soe.ucsc.edu along with a brief sentence or two on what can be found at the link.
• (for extra credit) What major development(s) in the availability of UNIX has/have occurred since the publication of our textbook?

Homework Policies: You may study together in small groups and discuss ideas about the homework problems before composing the solutions. You are expected, however, to write the solutions yourselves and not copy them from other students or sources (e.g. answers in book) nor share your solutions with other students. If you have worked closely with other students on particular problems, then you must mention the names of the people you have worked with and also the problems on which you worked together.
