Slug Events

Project Description:
Slug Events is an iOS application that informs the user of current and upcoming UC Santa Cruz events happening on or close to campus.

Technologies:
Swift, Xcode, Apple Mapkit, Git

Features:
- Map that displays events by location
- Push Notifications that alert the user of upcoming events
- Events organized by category (College, Sports, Entertainment, Science, etc.)
- Events listed via timeline (happening Today, This Week, This Month, This Quarter)
- ‘Search’ functionality

Obstacles:
Need to get well acquainted with Swift and Xcode. We’ll need to do a lot of research on how to implement many of the app’s features.

Ultimate Goal:
Become familiar with programming high-end applications for the iOS platform.
