We will have weekly (roughly) written homework assignments plus one midterm and one final. Composition of evaluation (tentative):

- 30 percent for homework assignments.
- 30 percent for midterm.
- 40 percent for final.

The readers will grade all homework problems. All tests will be closed book. If students express interest then I will place additional texts of various levels and other materials on reserve in the Science Library.

I might assign extra credit problems in the assignments and may be also in the tests. If you solved a significant amount of the extra credit problem, I will mention it in your final evaluation.

The prerequisite for this course are CIS 101 (Abstract Date Types) and CE 16 (Discrete Math). You cannot pass the class unless you have had both of these courses or are able to receive waivers for the courses. You need to give me the waiver(s) by the end of the 2nd class. To obtains such a waiver, please talk to the Undergraduate Director.

You must do all assignments by yourself !!! Cheating will be punished by strongest means available to me, which include:

- Letter to your provost.
- Grade zero on the particular test or assignment.
- Mention that your cheated in your evaluation.
- Failing the course.
- Exclusion from Major or from University.

Cheating on the homework means:

- Copying somebody else’s solution.
- Not acknowledging working with others when you did.

Cheating in the tests means:

- Copying any material from another student or talking to another student.
- Using any material that you are not allowed to explicitly.
