CMPS 201
Analysis of Algorithms
Summer 2007 (June 25 – August 20)

Description:
Rigorous analysis of the time and space requirements of important algorithms, including worst case, average case, and amortized analysis. Techniques include order-notation, recurrence relations, information-theoretic lower bounds, adversary arguments. Analysis of the key data structures: trees, hash tables, balanced tree schemes, priority queues, Fibonacci and binomial heaps. Algorithmic paradigms such as divide and conquer, dynamic programming, union-find with path compression, augmenting paths. Selected advanced algorithms. Introduction to NP-completeness. Prerequisites: To take this course you must have completed an undergraduate course in data structures (such as CMPS 101), an undergraduate course in algorithms (CMPS 102), or an undergraduate course in graph theory (CMPE 177).

Time and Place: MW 6:00 – 8:25 Baskin School of Engineering Silicon Valley Center
Class Webpage: http://ic.ucsc.edu/~ptantalo/cmps201/Summer07/
Class Webforum: http://forums.soe.ucsc.edu/viewforum.php?f=40

Instructor: Patrick Tantalo (http://www.cse.ucsc.edu/~ptantalo/)
Email: ptantalo@soe.ucsc.edu
Office: UCSC E2 257
Office Hours: MW 10:00-1:00, and by appointment
Phone: 831-459-3898

Required Text:

Optional Texts:

Coursework and Evaluation:
Homework assignments and due dates will be announced in class and on the webpage. The Midterm Exam will be held in class on Wednesday July 25. The Final Exam will be held on Monday August 20, 6:00-9:00 pm. Course work will be weighted as follows:

<table>
<thead>
<tr>
<th>Component</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Homework</td>
<td>10%</td>
</tr>
<tr>
<td>Midterm Exam</td>
<td>45%</td>
</tr>
<tr>
<td>Final Exam</td>
<td>45%</td>
</tr>
</tbody>
</table>

The grading scale for the class will be approximately: A+:97%-100%, A:93%-96%, A-:90%-92%, B+:87%-89%, B:83%-86%, B-:80%-82%, C+:76%-79%, C:70%-75%, D:60%-69%, F:0%-59%. Letter grade boundaries may be lowered at my discretion in order to eliminate some borderline cases.
Academic Honesty:
In recent years, there has been an increased number of cheating incidents in many UC campuses, and unfortunately, UCSC is no exception. The Baskin School of Engineering has a zero tolerance policy for any incident of academic dishonesty. If cheating occurs, consequences within the context of the course may range from getting zero on a particular assignment, to failing the course. Cheating in any part of the course may lead to failing the course and suspension or dismissal from the university.

What is cheating? In short, it is presenting someone else’s work as your own. Examples would include copying another student's written homework assignment, or allowing your own work to be copied. Although you may discuss problems with fellow students, your collaboration must be at the level of ideas only. Legitimate collaboration ends when you "lend", "borrow", or "trade" written solutions to problems, or in any way share in the act of writing your answers. If you do collaborate (legitimately) or receive help from anyone, you must credit them by placing their name(s) at the top of your paper.

To view the full text of the new policy on academic integrity on the Web, see:
