Minimum 3 queries

- Sortings accounts by value
- Count request frequency by type (ex. equipment type)
- Your choice – justify why your query is useful to the business

Company (account) table given

Create request table

Fields:

- Request ID
- Customer ID
- Date
- Equipment type
- What kind of problem
- Detailed problem description
- Price

Create a report showing customer service representatives which service calls they should respond to first on a specific date.

It means to decide a date of your choice, pick up all the requests on exactly that day, and then sort the transactions with respect to account size in descending order.
